# cuteFM
Facility Management Simplified

CUTE INFOCOMM

Fault Reporting
cuteFM enables efficient fault management with case registration, assignment, and tracking via mobile and web interfaces. The system supports notifications, workflows, and audit trails for full accountability.

Contractors Management
cuteFM streamlines contractor workflows, allowing for the acknowledgment and rectification of tasks, with capabilities to pause and resume jobs as necessary for optimal task management.

Preventive Maintenance
cuteFM facilitates scheduled preventive maintenance, including approval processes, job execution tracking, and checklist submissions to ensure reliable facility operations.

Contract Management
This module manages all contract details from initiation to closure, featuring alerts for financial thresholds and seamless integration with tenancy management for renewal notifications.

Tenancy Management
cuteFM manages tenancy agreements with detailed record-keeping and automated renewal alerts, ensuring all contracts are current and compliant.

Reports
The reporting feature provides essential insights into defects, maintenance, and contract statuses, supporting strategic decision-making and resource management.

Dashboard
The dashboard presents real-time operational data and alerts from all management modules, enabling quick access to crucial information and enhancing operational responsiveness.
